

## Separation container

Fully assembled separation plant in weatherproof 10'-container

### Advantages of a container solution:

- Plant mounted ready for connection / little installation effort at the point of use
- Completely wired system control / user-friendly
- Easily accessible and protected from the weather
- Pleasant and clean work during maintenance and care of the plant

- 1 Simple construction in a weatherproof 10'- Container
- 2 Proven in practice for years is the separation container with fully automatic control and monitoring of the separation
- 3 The system control as well as a work light and a working socket are completely assembled - easy to operate thanks to a Siemens Logo with display.
- 4 Programmable flow meter and electrical central lubrication ensure safe and low-maintenance operation of the complete system.
- 5 Discharge chute for clean solids discharge. It also serves as a guardrail with the lid open during operation.
